

To reach Tumblin Lake from CRTA headquarters, take Main Drain Road south from the CRTA check-in station. One mile after Main Drain crosses I-5 watch for the cell tower on your left. About 250 yards south of the cell tower turn left (east) onto the dirt road just before Main Drain crosses the Semitropic Canal. Follow the dirt road that runs parallel to the canal about 1.2 miles to the entrance to Tumblin Lake.

**STAY OFF** the levee road that runs beside the canal, use the lower dirt road as your route as much as you can. Note: Do not cross any of the bridges over the canal. Stay on the north side of the canal all the way to I-5, cross the canal at the edge of I-5, then bear right to head for the entrance to Tumblin Lake.

Please do not use the access off of Carmel Road to reach Tumblin Lake any more. Use the above route.
